Resolve the file to edit
Is it the deployed configuration's source?
yes
no
Refuse if pm-engine runs or the file has undeployed edits
Edit only
Build the listing: price, seed quote, sections
Refuse if saved engine state exists for the symbol
Append it to 'symbols:' and check nothing else changed
Validate and compile the whole edited file
Replace the file, keeping its permissions
Deployed source?
yes
no
pm-config-deploy it
Print: run pm-config-deploy
